**RFI FY20-06  
RADIO COMMUNICATIONS  
ADDENDUM 1  
August 6, 2020**

This addendum is to answer questions asked by potential responders for the above RFI.

1. Could an estimated timeline be provided for agencies migrating to a 700/800 MHz system beginning at cutover? Specifically, how many users will be migrating to the 700/800 MHz system and in what timeframe?
  - It would be premature to answer this question at this time without knowing the cost to transition to a 700/800 MHz system and how it would impact others who did not transition
  
2. Does the original RFP and its requirements play a role in evaluation of the RFI responses? And if so, please clarify and reference the particular information from the document.
  - No, all submittals from the original RFP were rejected. No information from those submittals will be considered. Any information should be submitted in the RFI for consideration.
